THE 3RD INTERNATIONAL #ISS3

smoke SYMPOSIUM

RALEIGH, NORTH CAROLINA AND **UNIVERSITY OF CALIFORNIA, DAVIS, USA**

APRIL **20-24** 2020

Building on the previous two successful editions, this symposium is a venue and international nexus for sharing the latest developments in public health science, ecology of smoke, research, management, and policy around the important topic of smoke from wildfires, rangeland fires, forest fires and prescribed burns.

Virtual Conference/Trade Show

The physical trade show will be at the Raleigh location only, however, we will also be offering a virtual trade show which allows us to expand our attendance and include individuals who cannot travel to the symposium. This will also allow integration of an online learning component, which will support active connection with our audience year-round. Remote participants will be able to view the presentations live and interact with the presenter and Exhibitors.
