

EXAMPLE OF A "BAD" POSTER

This poster was designed to be 6 feet wide by 4 feet high. Unfortunately, there is simply too much content. The results are text and graphics set too small to be easily legible. The background photo makes it even harder to read. Unnecessary logos add to the visual confusion.

- Poster title is too long
- Type is too small
- Was not carefully proof-read (see error in title)

Langmuir Supercells at the LEO-15 Ocean Observatory: an important mechanism for resuspension and transport of sediment and bioactive material in shallow shelf seas

- Author names are too small
- First names should be given
- The full address is not necessary
- E-mail address should be given for contact info

- A poor-quality graphic makes the poster unprofessional
