Who should attend:

- Managers
- Practitioners
- Researchers

Nov. 30, 2005—Abstracts due
Dec. 31, 2005—Notice of acceptance
March 29, 2006—Papers due

Dec. 1, 2005—Registration begins
(Credit cards won't be charged until March 7, 2006)

Fuels management programs are designed to reduce risks to communities and to improve and maintain ecosystem health. This conference will address development, implementation, and evaluation of these programs, with a focus on *how to measure success*.

Please consider submitting an abstract for a presentation on the following topics. You can write a paper for publication in the proceedings if you choose, but it is not required.

- Case studies
- Collaboration
- Policy considerations
- Fuel characterization
- Change detection
- Remote sensing
- Monitoring
- Assessing and measuring risk
- Economic and operational efficiency
- Fire behavior and effects modeling
- Wildland Urban Interface
- Wilderness, parks, roadless areas
- Biomass utilization

**To submit abstracts
and for more information,
