PRESENTER GUIDELINES

Schedule & Format:
Please refer to the program schedule to determine the length of your presentation, the majority of the presentations are 12 minutes + 3 minutes for Q&A and transition. There are also 5 minute Ignite Talks. Please ensure you don’t run over your allotted time by practicing your talk.

Virtual Conference
We are pleased to share that we will have two options for your presentation:

1) **You can pre-record your presentation.** We will schedule blocks of time between March 30-April 10th to record your presentation. This means you will need to have your presentation ready in the next couple of weeks so please consider that when making your decision.

2) **Present your presentation live via WebEx during the Virtual Conference.** We will probably schedule all of the live presentations on Tuesday and Wednesday, April 21st and April 22nd, so you would need to be available one of those days. We will have practice sessions to ensure you are comfortable with the technology – you would be required to attend one of those practice sessions.

Your presentation should be formatted 16:9, which is the default for PowerPoint 2016.

Virtual Posters
We will include a virtual poster session. You will be permitted to submit one PDF or PowerPoint slide series not to exceed 10 slides prepared exactly the way you would submit this to a printer.

- The slides would contain the same content that you would display on a printed poster board.
- The first slide should show the full title of your submission.
- Each slide title should be placed in a title placeholder. This allows that title to come across in the hyperlinks on the left bar.
- Place the title of your presentation and your name at the bottom of each slide.
- It is suggested that type size should be at least 24 point. The typeface chosen should be a simple and clear one (e.g., Helvetica).
- When importing or inserting any graphic file (picture) it is important to make sure that it will function on any computer and does not require proprietary software to view. The acceptable formats are as follows: Bitmap (BMP), GIF, JPEG (JPG), Portable Network Graphic (PNG), and TIFF (TIF).
The deadline to submit your virtual poster is April 6th.

Questions: Send any questions to Mikel Robinson at execdir@iawfonline.org.

SPECIAL ISSUES
We are working on ISS3 Special Issues in four professional peer-reviewed journals:

- GeoHealth
- International Journal of Wildland Fire (IJWF)
- Journal of the Air & Waste Management Association (JA&WMA)
- Atmosphere “Biomass Burning and Emissions Modeling and Simulation”

We are also seeking applied program, management strategies and policy articles to feature in Wildfire Magazine.

The deadlines for each will be around June 30-July 1, 2020. Please visit the ISS3 website for details of these special issues. We are now accepting Expressions of Interest to publish in one of these Special Issues. Complete this form no later than May 4th. After the deadline you will receive an invitation to submit.

EXPRESSION OF INTEREST FORM

GENERAL GUIDELINES FOR PRESENTERS
IAWF individually and together with other partners around the world, plan, implement, and present significant conferences and workshops annually. These events are the foundation of our information dissemination and facilitation of global communication about wildland fire information.

We place high importance on integrity, responsibility and reputation and expect members to display high standards of behavior that are conducive to creating and maintaining diverse and inclusive practices. This includes the manner in which we conduct ourselves in normal business practices and at our conferences.

In order to better assist conference presenters, panel members, and other participants, we have prepared these guidelines to help improve understanding of our changing social environment, the importance of considering audience perception, and how to prepare to ensure that appropriate language and images are used during presentations at conferences and workshops. In this guide we provide some helpful advice on presentation ethics; oral presentation language in terms of implications to sensitivity, respect, and inclusivity; thoughts on developing presentation visual aids; and identified areas of inappropriate behavior.

IAWF expects all presenters to:
• Provide opportunities for others to learn and develop in ways that are in keeping with the IAWF commitment to diversity, equity, and inclusion.
• Refrain from demeaning, discriminatory, or harassing behavior, materials, and speech.
• Refrain from harassment of or any form of discrimination against another participant, staff member, volunteer or others.
• Always fully disclose and resolve any existing or potential conflicts of interest.
• Always keep proprietary information confidential unless the appropriate person authorizes its disclosure.

Presentation Ethics:
(From: https://courses.lumenlearning.com/publicspeaking/chapter/chapter-3-ethical-speaking/)

- Be honest, avoid plagiarism, and identify sources.
- Decide when to cite – all information that is not public knowledge should be cited.
- Cite sources properly.
- Understand paraphrasing and direct quotations.
- Use accurate citations.
- Be mindful of potentially sensitive graphics and words
- Provide honest and open communication.

Principles of Responsible Presentations:
Speakers must balance perceptions, intentions, speaker rights, and responsibility to audiences. Any person participating in IAWF activities is expected to refrain from demeaning, discriminatory, or harassing behavior, materials, and speech.

Ethical communication may not be hard to deliver, but at times can suffer from failure to fully understand effects of aspects of communication. All presentations must strive to:
• Promote diversity,
• Use inclusive language,
• Avoid hate speech, and
• Present clear and respectful visual aids.

Promote Diversity:
• Speakers have a responsibility to appreciate differences among individuals and groups.
• Consider both your audience and your speech content.
• Use both sexes in hypothetical examples.
• Use co-cultural groups in hypothetical examples.
• Do not use negative or derogatory comments related to to gender, sexual orientation, disability, physical appearance, body size, race, religion, age, national origin, socio-economic status, nudity and/or sexual images.
• Avoid stereotypes.
• Always remember, even if it doesn’t concern you – it may offend others.
• Look at your slides – try to balance the type of people presented so they are not all the same or in stereotypical roles.

**Use Inclusive Language:**

• Avoid sexist language.
• Inclusive nouns are important for example, instead of fireman, use firefighter or chairperson, instead of chairman.
• Use gender-neutral pronouns. Gender neutral pronouns include they, them and their.
• Gender decoders exist to provide assistance in appropriate word selection: Several of these decoders can be found at the following links:
  o [https://www.niu.edu/writingtutorial/style/bias-free-language.shtml](https://www.niu.edu/writingtutorial/style/bias-free-language.shtml)
  o [https://www.tomforth.co.uk/genderbias/](https://www.tomforth.co.uk/genderbias/)

**Avoid Hate Language:**

• Words are powerful, choose them wisely.
• Avoid using words that convey any expression of intolerance and hatred.

**Present Clear and Respectful Visual Aids:**

• Understand that times and social expectations have changed, and cultures are different around the world – what was acceptable in the past may no longer be acceptable now and what may be acceptable or taken as humorous may be offensive in other cultures.
• If you are making a joke, or think it is funny – it may not be to others – remember you don’t know their circumstances. Try to understand your audience and prepare accordingly.
• Visual aids should be evaluated in terms of the wording and pictures they use, and analogies they convey.
• Visual aids must value sensitivity, incorporate respect, and be inclusive.
• Be mindful to those who have color blindness (look into the colors) - [https://usabilla.com/blog/how-to-design-for-color-blindness/](https://usabilla.com/blog/how-to-design-for-color-blindness/)
• If in doubt – don’t use it.
• Presentations should be accessible to a broad audience.
• Text must be of a reasonable size (suggest 24 point), in a clear, easily legible font.
• Figures must have legible axis and color scheme.
